

## 150mm Edge with Tape & Overlap

Edge strip is placed where the screed meets the vertical structural elements. They help compensate for thermal elongations of the heating floor. Our edge strip provides working space for materials that change their volume under the influence of temperature.

Available in 2 different lengths.

Product Code	Product Description
TIOEDG0002	50m 150 x 8mm edge strip with tape and overlap
TIOEDG0003	25m 150 x 8mm edge strip with tape and overlap
