

150mm Edge with Tape & Overlap

Edge strip is placed where the screed meets the vertical structural elements. They help compensate for thermal elongations of the heating floor.

Our edge strip provides working space for materials that change their volume under the influence of temperature.

Available in 2 different lengths.

Product Code	Product Description	Dimensions
TIOEDG0002	Edge strip with tape and overlap	150 x 8mm - 50m
TIOEDG0003	Edge strip with tape and overlap	150 x 8mm - 25m

Materials	Physically foamed polypolyethylene without using CFC and HCFC
Volumetric weight	20 ÷ 35 kg/m³
Dimensional stability	±1.17%
Water absorption	Maximum 8%
Resistance	Minimum 29 kPa
Firmness in pull at breaking (upright and in direction)	Minimum 0.20 MPa
Extension at breaking (upright and in direction)	Maximum 88%
Temperature range of use	-40°C ÷ +90°C
Thermal conductivity (0°C)	0.045 W/mK
